

Frequently Asked Questions

Q: Is the treatment painful or uncomfortable?

A: No, HYDRO PLUS treatments are non-invasive and comfortable. Each handpiece delivers targeted care gently, making the experience soothing, with minimized pain.

Q: How long does a HYDRO PLUS session take?

A: Depending on the selected handpieces and your personalized treatment plan, a session typically lasts 10 to 30 minutes.

Q: How many treatments are needed for best results?

A: You may see improvement after just one session, but for optimal and longer-lasting results, a series of 3 to 6 sessions spaced 2 to 4 weeks apart is typically recommended.

Q: Is HYDRO PLUS safe for all skin types?

A: Yes, HYDRO PLUS is suitable for all skin types, including sensitive or mature skin. Your physician will customize the settings and treatment steps to match your individual skin condition.

Q: Is there any downtime after treatment?

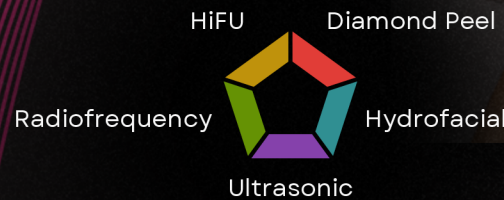

A: There's no downtime. You can return to your regular activities immediately with glowing, refreshed skin.

HYDRO PLUS

5 Technologies, One Radiant You.

- ✓ Diamond Peel
- ✓ Hydrofacial
- ✓ Ultrasonic
- ✓ Radiofrequency
- ✓ HiFU

What is HYDRO PLUS?

HYDRO PLUS is a multifunctional skin rejuvenation device equipped with five advanced handpieces: Diamond Peel, Hydrofacial, Ultrasonic, Radiofrequency, and HiFU. It offers a complete skincare solution—from cleansing and exfoliation to lifting and tightening—all in one treatment.

Diamond Peel

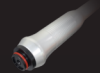

Diamond Peel offers precise mechanical exfoliation using a diamond-coated tip to gently remove dead skin cells and impurities from the skin surface. This non-invasive procedure helps refine skin texture, minimize pores, and promote healthy cell turnover.

Mechanical Exfoliation

- Removes dead skin cells and impurities
- Refines skin texture
- Minimizes pores
- Promotes healthy cell turnover
- Enhances skin brightness
- Prepares the skin for better absorption of active ingredients

Hydrofacial

Hydrofacial combines hydration therapy with suction-based cleansing to deeply purify the skin while replenishing moisture. Its unique spiral tip design effectively removes dead skin cells, excess sebum, and impurities while delivering moisture deep into the skin.

Hydration & Suction-based Cleansing

- Purifies the skin
- Replenishes moisture
- Removes dead skin cells, excess sebum, and impurities
- Improves skin clarity, texture, and overall radiance

Ultrasonic

Ultrasonic uses high-frequency sound waves to enhance the delivery of active ingredients into the skin through a process called sonophoresis. Simultaneously, gentle micro-vibration massage stimulates blood circulation and promotes lymphatic drainage.

Sonophoresis & Micro-vibration Massage

- Enhances the delivery of active ingredients into the skin
- Stimulates blood circulation and promotes lymphatic drainage
- Improves skin tone, elasticity, and absorption of skincare products

Radiofrequency

Radiofrequency (RF) delivers controlled thermal energy deep into the skin to stimulate collagen and elastin production. This non-invasive treatment promotes skin tightening and improves overall elasticity, resulting in a firmer and more lifted appearance.

Collagen Production & Mild Lifting

- Stimulates collagen and elastin production
- Promotes skin tightening and improves overall elasticity
- Reduces fine lines, mild sagging, and early signs of aging

HiFU

HiFU targets the deeper layers of the skin, including the SMAS layer, to stimulate collagen remodeling and achieve a natural lifting effect. As a result, it tightens and firms sagging skin without the need for invasive procedures.

Lifting (Hifting) & Firming

- Achieves a natural lifting effect
- Tightens and firms sagging skin

Indications

Mechanical Exfoliation

Hydration & Suction-based Cleansing

Sonophoresis & Micro-vibration Massage

Collagen Production & Mild Lifting

Lifting (Hifting) & Firming

Comfortable & Pain-free
