

Indication

Diamond Peel

Mechanical Exfoliation

- Removes dead skin cells and impurities
- Refines skin texture
- Minimizes pores
- Promotes healthy cell turnover
- Enhances skin brightness
- Prepares the skin for better absorption of active ingredients

Ultrasonic

Sonophoresis & Micro-vibration Massage

- Enhances the delivery of active ingredients into the skin
- Stimulates blood circulation and promotes lymphatic drainage
- Improves skin tone, elasticity, and absorption of skincare products

Hydrofacial

Hydration & Suction-based Cleansing

- Purifies the skin
- Replenishes moisture
- Removes dead skin cells, excess sebum, and impurities
- Improves skin clarity, texture, and overall radiance

Radiofrequency

Collagen Production & Mild Lifting

- Stimulates collagen and elastin production
- Promotes skin tightening and improves overall elasticity
- Reduces fine lines, mild sagging, and early signs of aging

HiFU

Lifting (Hifting) & Firming

- Achieves a natural lifting effect
- Tightens and firms sagging skin

Technical specification

Diamond Peel HP	#140 / #170	
Hydrofacial HP	Regular / Narrow	
Ultrasonic HP	1 MHz / 3 MHz	
Radiofrequency HP	1 MHz	
HiFU HP	<u>Standard</u>	<u>Optional</u>
	Dot: 3.0, 4.5 mm	Dot: 1.5, 6.0, 9.0, 10.0, 13.0 mm Line: 3.0, 4.5 mm
Vacuum Pump	Up to 650 mmHg (±10 %)	
Power Consumption	80 W	
Aqua Waste Tank	1200 cc	
Input Voltage	100/220 VAC, 50/60 Hz	
Dimension (W*L*H)	460 mm (W) X 420 mm (L) X 1100 mm (H)	
Weight	30 Kg	

HYDRO PLUS

All-in-One Skin Treatment Platform

Diamond Peel Handpiece

Hydrofacial Handpiece

Ultrasonic Handpiece

Radiofrequency Handpiece

Dot HiFU Handpiece

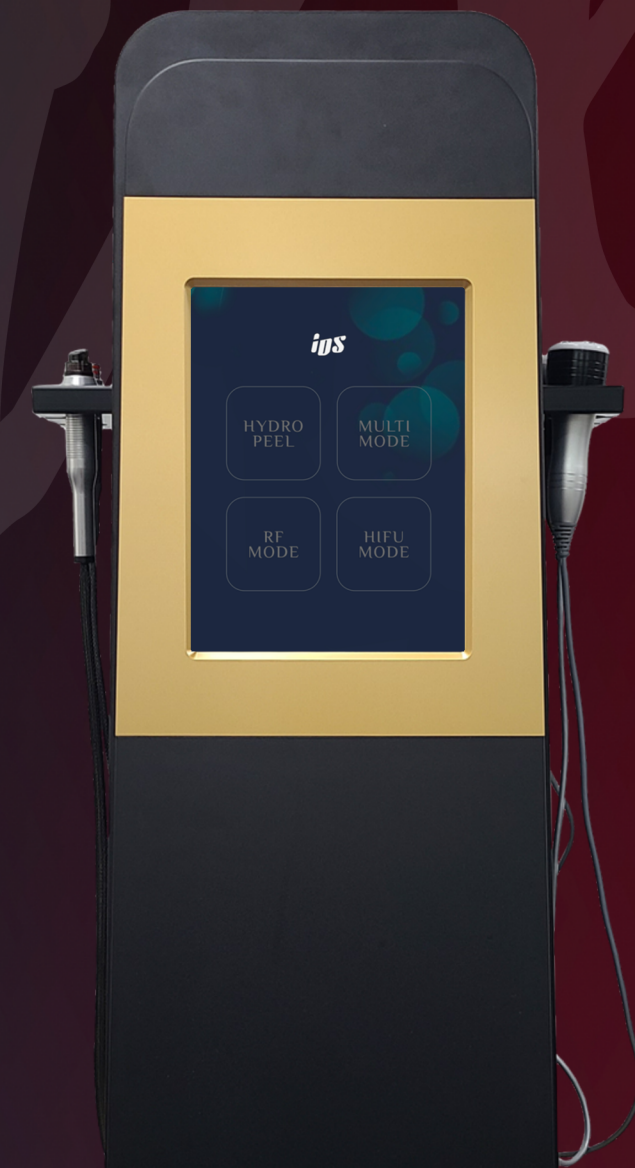

Liner HiFU Handpiece*

* Optional

HYDRO PLUS, a next-generation all-in-one skin treatment platform, is engineered to elevate facial rejuvenation through a synergistic combination of technologies. Designed to target multiple layers of the skin, HYDRO PLUS integrates five specialized handpieces—Diamond Peel HP, Hydrofacial HP, Ultrasonic HP, Radiofrequency HP, and HiFU HP—for comprehensive care from exfoliation to lifting.

This versatile system addresses a wide range of skin concerns including dullness, dehydration, loss of elasticity, and signs of aging. By combining mechanical peeling, deep serum infusion, and energy-based tightening, HYDRO PLUS empowers practitioners to deliver visible, long-lasting results tailored to individual skin needs across all skin types.

Diamond Peel for Mechanical Exfoliation

Diamond Peel offers precise mechanical exfoliation using a diamond-coated tip to gently remove dead skin cells and impurities from the skin surface. This non-invasive procedure helps refine skin texture, minimize pores, and promote healthy cell turnover. It enhances skin brightness and prepares the skin for better absorption of active ingredients in subsequent treatments. Ideal for all skin types, Diamond Peel leaves the skin smoother, clearer, and more radiant.

Available Configurations

- #140
- #170

Diamond Peel Handpiece

Diamond Peel HP

Mechanical exfoliation

Hydrofacial HP

Hydration,
Suction-based cleansing

Ultrasonic HP

Sonophoresis,
Micro-vibration massage

Radiofrequency HP

Collagen production,
Mild lifting

HiFU HP

Lifting (Hifting),
Firming

Hydrofacial for Hydration and Suction-based Cleansing

Hydrofacial combines hydration therapy with suction-based cleansing to deeply purify the skin while replenishing moisture. Its unique spiral tip design effectively removes dead skin cells, excess sebum, and impurities while delivering moisture deep into the skin. This dual-action process improves skin clarity, texture, and overall radiance. Suitable for all skin types, Hydrofacial leaves the complexion feeling clean, smooth, and deeply hydrated.

Available Configurations

- Regular (for face)
- Narrow (for nose)

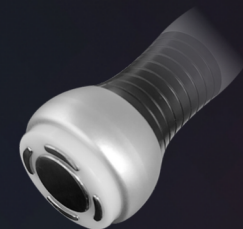

Hydrofacial Handpiece

Ultrasonic for Sonophoresis and Micro-vibration Massage

Ultrasonic uses high-frequency sound waves to enhance the delivery of active ingredients into the skin through a process called sonophoresis. Simultaneously, gentle micro-vibration massage stimulates blood circulation and promotes lymphatic drainage. This dual-action treatment helps improve skin tone, elasticity, and absorption of skincare products, for example, whitening and brightening ampules. It is ideal for revitalizing dull, tired skin and achieving a more radiant complexion.

Available Configurations

- 1 MHz
- 3 MHz

Ultrasonic Handpiece

Radiofrequency for Collagen Production and Mild Lifting

Radiofrequency (RF) delivers controlled thermal energy deep into the skin to stimulate collagen and elastin production. This non-invasive treatment promotes skin tightening and improves overall elasticity, resulting in a firmer and more lifted appearance. It is especially effective for reducing fine lines, mild sagging, and early signs of aging. Safe for most skin types, RF provides gradual, natural-looking rejuvenation with no downtime.

Available Configurations

- 1 MHz

Radiofrequency Handpiece

HiFU for Lifting and Firming

HiFU targets the deeper layers of the skin, including the SMAS layer, to stimulate collagen remodeling and achieve a natural lifting effect. As a result, it tightens and firms sagging skin without the need for invasive procedures.

HYDRO PLUS features standard Dot HiFU cartridges designed to deliver precise dot-type HiFU energy. HYDRO PLUS also offers optional Liner HiFU cartridges that provide precise line-type HiFU energy delivery.

Available Configurations

Standard

- Dot: 3.0, 4.5 mm

Optional

- Dot: 1.5, 6.0, 9.0, 10.0, 13.0 mm
- Line: 3.0, 4.5 mm

Dot HiFU Handpiece

Liner HiFU Handpiece
